

# Electronic Switch

## Product Specifications

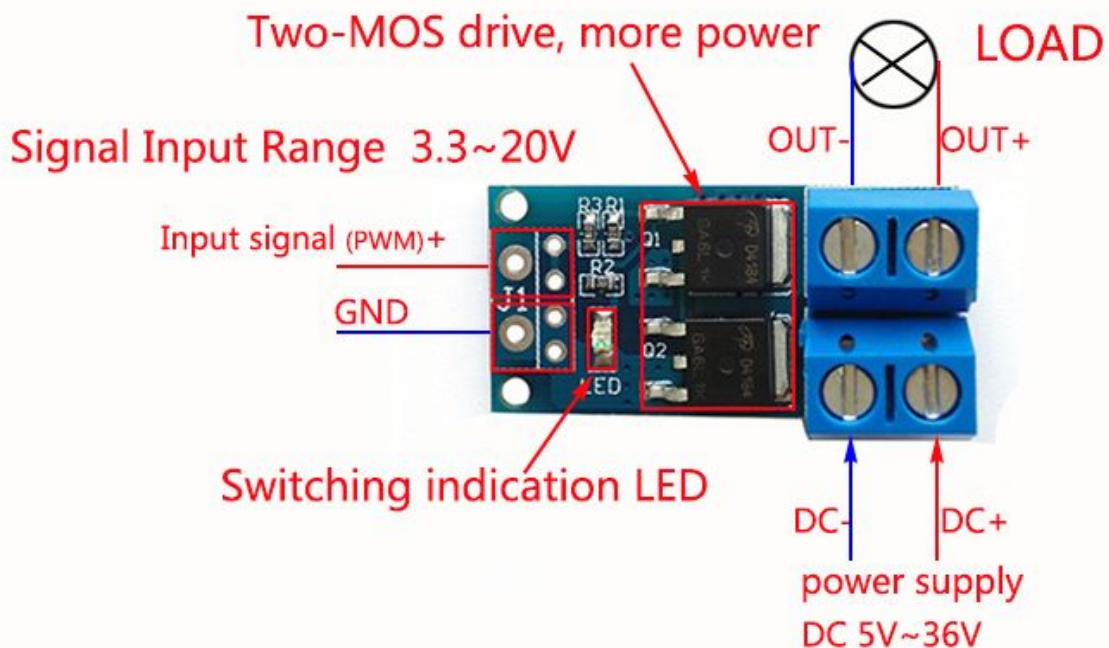

Working voltage: DC 5V - 36V;

The trigger source: digital high-low (DC3.3V - 20V), can be connected to a microcontroller IO port, PLC interfaces, DC power, you can access the PWM signal, the signal can be supported frequency range 0--20KHZ.

Output capacity: DC DC 5V - 36V, at room temperature, continuous current 15A, power 400W!

Working temperature: -40-85 °;

Size: 3.4 \* 1.7 \* 1.2cm.

Perfect PWM control , PWM frequency range 0~20KHZ
